Mission: Provide excellent health care by promoting wellness and healing through trusting relationships.
Vision: To be the regional center of excellence in health and wellness.
As a leading health care provider in the region, Good Samaritan serves the communities of ten counties with the safest, most reliable care. Our culture is everything and we continue to learn, grow and improve our practices to stay ahead of an ever-changing health care environment. No matter what changes Good Samaritan may see, our number one focus will always be to provide excellent patient care.

As we take a look back at our progress in 2015, Good Samaritan has had continued success and achievements. We continue to reach patients outside the four walls of our facility with more than 23,000 free community health screenings. Good Samaritan continuously reaches the 90th percentile and performs at world class status according to National Patient Safety Goals. We strive to seek out new physicians and advanced practitioners that share our core values and will bring new knowledge to our facility.

The future of Good Samaritan is bright and as we continue to grow as an organization, many developments will take place. Our collaboration with other hospitals and medical centers is vital for maintaining our success within the community and region. Our focus will always be our patients and how we can best care for them. As the world of health care changes, Good Samaritan will remain your best, first place for excellent health care.

Sincerely,

Rob McLin
President & CEO
Good Samaritan serves more than 230,000 residents throughout 10 counties in southwestern Indiana and southeastern Illinois.

Women have a habit of neglecting their own health. This is why Good Samaritan hosts the "Spring Screenings" event every year. In June of 2015, the tenth annual women's health event encouraged 260 women attending to make their own health a priority. Numerous free-of-charge health screenings were provided as well as information about health, nutrition, exercise and stress relief.

Men often fail to pay attention to their health. This is why the annual "Men's Health Tune Up is just for them. The 2015 event, attended by more than 600 men, offered a variety of free health screenings and information. Clinicians were also on hand to educate men about their health and steps to live a healthier lifestyle.

Proper training for performing CPR is essential. In 2015, Good Samaritan's Community Health certified 75 people in CPR at no charge to them. These individuals were police officers, firefighters and emergency medical personnel. They also received free Automatic External Defibrillator Training at Community Health.

Hand washing is important for preventing the spread of countless illnesses, including the cold and flu viruses, especially in children. The Germbusters program teaches students the correct way to thoroughly wash their hands and the health benefits of doing so. Community Health Services at Good Samaritan brought the Germbusters program to 995 first grade students and preschool / daycare children in 2015.

Good Samaritan is fighting obesity in children with its Fit Kids program. The program targets third, fifth, seventh and ninth graders. Registered nurses spend three, 30 to 45 minute sessions with students in Vincennes Community, Vincennes Catholic, South Knox and North Knox school corporations promoting healthy food habits and healthy activity. Throughout 2015, there were 1,571 children who participated in Fit Kids.

One in eight women in the United States will develop invasive breast cancer during their lifetime. Early detection is key to finding and treating breast cancer. Screening mammograms find cancers before they start to cause symptoms and ultimately save more lives. In 2015, Good Samaritan's Breast Care Center performed 5,419 screening mammograms.
Primary Care Clinic

Good Samaritan's founding principle is that every person should have access to basic medical care, regardless of their ability to pay. The Primary Care Clinic offers high-quality patient care to individuals who do not have health insurance and those who have Medicaid. The fee is based upon a sliding scale and determined by income. In 2015, there were 3,987 patient visits to the Primary Care Clinic.

Lung Cancer Screenings

It is estimated that 224,390 new cases of lung cancer will be diagnosed in 2016. Tobacco use is a leading cause of lung cancer in both men and women. Good Samaritan now has the opportunity to find evidence of lung cancer sooner by offering Low Dose CT (LDCT) lung screenings that have been shown to save numerous lives in high risk populations. In 2015, 51 individuals participated in LDCT and evidence of lung cancer was found sooner in two of the participants.

Convenient Care Clinic

At the Convenient Care Clinic, patients have access to medical care and diagnostic testing when their health care provider is unavailable. The clinic is dedicated to treating minor injuries and illnesses that need priority attention, instead of visiting the Emergency Department. In 2015, 8,628 individuals came to the Convenient Care Clinic.

Free Community Health Screenings Performed in 2015

- 68% of the 5,619 free blood pressure screens were abnormal
- 41% of the 1,676 free total cholesterol screens were abnormal
- 31% of the 1,732 free blood glucose screens were abnormal
- 35% of the 249 free HGB/A1C (hemoglobin test for diabetes patients) screenings were abnormal
- 12% of the 1,576 free Glomerular Filtration Rate (kidney function) screenings were abnormal
- 43% of the 1,571 Fit Kids screened were either overweight or obese
- 19% of the 1,809 Fit Kids blood pressure screenings were abnormal
**Gross Charge per Adjusted Discharge**

Gross Charge per Adjusted Discharge represents the total charges generated by the number of patient discharges that are adjusted to reflect both the impact of inpatient and outpatient volumes. Good Samaritan is one of the lowest cost providers in the state.
